Adrien Schmidt Speaks at Pinterest HQ with Georgetown Tech Alliance

Panel discussion on the future of information retrieval using AI

SAN FRANCISCO , CALIFORNIA, UNITED STATES, April 23, 2018 /EINPresswire.com/ -- The Georgetown Tech Alliance commits themselves to serve the Georgetown Community as a premier resource for its members to advance their knowledge and foster their interests in the technology and business spaces. Each year, they host two events in the Bay Area to encourage the discussion of trending topics and innovation.

Adrien Schmidt, CEO and Co-Founder of Bouquet, the world's first AI-powered chatbot to turn data into meaningful conversation, completes the triad of expert panelists who will be a part of "Georgetown Tech Alliance: Searching for the Future". The panel discussion explores the continued integration of enterprises using voice/speech recognition to gather information and will be followed by an evening of networking. This event is hosted by Pinterest and will be located at their headquarters in San Francisco on April 26, 2018, from 5:30 pm to 8:00 pm.

> "
> We're at a perfect moment in information retrieval, where AI, BI & CI are coming together to create new, magical experiences for users."
>
> *Adrien Schmidt, CEO & Co-Founder of Bouquet*

"Georgetown prides itself on being a convener for intellectual discussions," says Michael Shim, Co-President of The Georgetown Alliance. "We are excited to once again bring together thought leaders to engage on a topic people that affects people's day to day lives.

The other two speakers are Brian Monahan (C'92), Head of Customer Strategy at Pinterest and Simonie Wilson, Voice User Interface Designer at Pindrop. All three panelists exemplify ways in which businesses have adapted to these advancements in strategy and the creation of new user products.

"We're at a perfect moment in information retrieval, where AI (artificial intelligence), BI (business intelligence) and CI (conversational interfaces) are coming together to create new, magical experiences for users," says Schmidt. "We believe that getting the insights you need should be as easy as chatting with a friend."

Aristotle, the name of Bouquet's AI-chatbot, is a pioneer in the AI race to automate how endless data is received, shared and understood. With Aristotle, enterprises are now able to interact with their data simply and naturally with voice recognition. Request a demo and see how they are changing the

conversation about analytics.

Georgetown Tech Alliance welcomes alumni as well as their friends and colleagues to these events, aiming to educate and inspire, affirming themselves as leaders in the tech hub. Attendees range from recent alumni to retired experts in their fields. For more information, visit their website at www.georgetowntechaliance.com and follow them on Twitter at @GWUSA.

About Adrien Schmidt

Adrien Schmidt is the CEO of Bouquet.ai and an internationally recognized entrepreneur, engineer and innovator. In 2004 he co-founded Squid Solutions, a software company based in Paris that provides usage analytics to publishers around the world. He rapidly turned companies into data-driven enterprises and opened offices in Beijing and San Francisco. On a mission to become a market leader in a new generation of analytics tools, Adrien co-founded Bouquet in 2015, an AI-powered chatbot that turns data analytics into meaningful conversation through natural language, acting as a mobile assistant 24/7. Adrien speaks five languages, is a Huffington Post contributor and most recently a featured speaker at Plotcon, Decentralized AI, IoT World.
