AVDS ® is now BeSeCURE® - Beyond Security Announces Name Change of its Flagship Product

CUPETINO, CALIFORNIA, UNITED STATES, April 16, 2018 /EINPresswire.com/ -- San Jose, CA – Beyond Security, a leading provider of automated security testing solutions including vulnerability management announced the name change of AVDS® to beSECURE® that will now include new capabilities in vulnerability assessment and will feature new GUI that will provide a new look and even better usability.

"Beyond Security has adopted this new name as a statement of the brand value of its products and is delivering on this

promise with a synergistic, two-pronged approach," said Aviram Jenik, CEO and Co-Founder of Beyond Security. "In conjunction with our leading-edge software development and service strategies, we have been pursuing the development of a strong corporate identity that will accurately represent our company and its services to our clients, prospects" and customers" stated Aviram.

"While our product name is changing, all core elements of the product strategy and functionality will remain the same. Beyond Security will continue to provide our customers and partners with the ability to objectively assess networks, applications and assets for vulnerabilities and compliance violations" he added.
beSECURE ®, or formally known as AVDS ® is a complete line of accurate, cost effective vulnerability assessment and web app security testing solutions. It is deployed as an appliance or cloud solution and delivers layer 3-7 scanning to networks of any size or complexity.

beSECURE® will also be featured at RSA 2018 in San Francisco. Visit us at booth #4529
"While AVDS (Automated Vulnerability Detection System) was a highly descriptive name at the time of its inception, we needed to create a uniform naming scheme to match our existing beSTORM® and beSOURCE® products. beSECURE® is also memorable and accurate given the product's focus on securing networks and assets," said Hamid Karimi, VP of Business Development at Beyond Security.

Beyond Security is a leading worldwide security solutions provider. It's testing tools accurately assess and manage security weaknesses in networks, applications, industrial systems and networked software. Beyond Security's product lines include, beSECURE ® for network vulnerability management and beSTORM® for software security testing, which can help secure network and applications and comply with the security policy requirements that exceeds industry and government standards.

Founded in 1999, Beyond Security's solutions are essential components in the risk management program for many organizations worldwide. With the headquarters located in Cupertino, California, Beyond Security's distributors and resellers can be found in North and South America, Europe, Asia, Africa, the Middle East and Australia.
