

Water Scarcity - Maximizing Resources

Alternative water resources and options

GEORGE, WESTERN CAPE, SOUTH AFRICA, April 18, 2018

/EINPresswire.com/ -- By harvesting [water from air](#) and utilizing rainwater in our homes and gardens, we not only reduce the demand for municipal water but also save our underground water resources.

With the current drought situation in the Western Cape, South Africa, it has become a reality by which people are forced to look for other water resource options. In many Countries [rain water harvesting](#) has become the norm when a new home is planned. Tripple Hydro & Energy, a South African based company who shares this vision, has positioned itself to assist in many of these areas by offering a wide range of products and solutions. Products, that supports the water harvesting mission are in the line of; Atmospheric "Water from Air" systems, Rain Water Harvesting kits and combos, Pressure booster kits, a full range of Water Pumps and [Solar Water Pumps](#). The option of making use of natural resources includes solar energy of which Tripple Hydro & Energy's vision is to offer solutions that is well designed and easy to install. Especially for those that consider to Do-it-Yourself (DIY). Clients looking for water harvesting or water pumping solutions can benefit as the products on offer are of very high quality.
