

San Diego Job Corps Gives Their Students High Tech Driving Lessons Behind the Wheel of a Driving Simulator

San Diego Job Corps center uses technology to reinforce classroom instruction in their driver education life skills course

EL DORADO HILLS, CA, US, April 18, 2018 /EINPresswire.com/ -- [Virtual Driver Interactive](#), Inc. (VDI), the leading provider of simulation-based driver training solutions for commercial and education applications, today announced that the San Diego Job Corps center added VDI simulation with [Virtual Driving Essentials](#) program to their driver education curriculum.

Job Corps is a program administered by the United States Department of Labor that offers free-of-charge education and vocational training to young men and women ages 16 to 24. Job Corps are committed to providing their students with 'success that lasts a lifetime' – and it is nowhere more evident than in the San Diego Job Corps center.

LX3 Full Cab

“

Job Corps students from all walks of life have benefited from the safe, inclusive and real-life driving situations that Virtual Driver Interactive provides.”

Specialist at San Diego Job
Corps*

"Job Corps students from all walks of life have benefited from the safe, inclusive and real-life driving situations that Virtual Driver Interactive provides," said Bonita V. Mason - Drivers Ed. Specialist at San Diego Job Corps. "Students are ready to face behind the wheel in real time once they complete the required lessons. Safety, reaction times, road conditions, traffic and unpredictable occurrences are all addressed in comfortable, controlled and safe settings. Virtual Driver Interactive allows each of our students to apply that knowledge and have more confident experiences once they are ready for the road."

Driving is a necessary skill required by most people to get to/from their job every day. Realizing the importance of this skill, San Diego Job Corps purchased VDI's three-screen full cab simulator (LX3) with the latest Virtual Driving Essentials driver training program. They used VDI's GSA contract ([GS-02F-0122W](#)) and they were able to easily purchase what they needed as well as achieve the most cost-effective price. By adding simulation to their

existing classroom and behind-the-wheel curriculum, they are now able to successfully train a large volume of students to get their driver's license and attain a higher level of employability.

About Virtual Driver Interactive

Virtual Driver Interactive (VDI) is well known in the simulation industry for its vision of innovative simulation-based training. From training experienced corporate fleets to new teen drivers, VDI

delivers effective training. VDI offers highly portable, affordable and effective solutions. Titles include Virtual HD® (Virtual Hazard Detection), designed specifically for corporate fleets; One Simple Decision®, a deterrent to distracted or impaired driving; Virtual DE™ (Virtual Driving Essentials), a driver training and assessment program teaching critical skills; and Boating Skills VT™ (Boating Skills Virtual Trainer), industry's leading simulation-based boating safety program. VDI is a privately-held company headquartered in El Dorado Hills, California.
