

Industry Leading Facial Feminization Surgeon, Dr. Vartan Mardirossian Offers A One Stop Shop for A FFS Surgery

Industry Leading Facial Feminization Surgeon, Dr. Vartan Mardirossian Offers A One Stop Shop for A FFS Surgery

JUPITER, FL, USA, April 18, 2018 /EINPresswire.com/ -- Even in today's more accepting society, being transgender is not easy. It is a brave journey in which a person has realized they were born in the wrong body as far as gender assignments. Men may decide they are women, or women may decide they are men.

Either way it goes, the journey to successfully becoming the gender you feel you should have been born in is a long one. In days past, multiple surgeons would need to be visited to transform your face, so your true self is shown to the world. The good news is that this is no longer the case.

The acronym FFS stands for '[facial feminization surgery](#).' This refers to the work done on a man's face to make it appear more like a female's and is an important process for transgender individuals seeking to show they are female – not male. Dr. Vartan Mardirossian has made it his job to make the process as seamless and uncomplicated as possible. He truly understands how difficult the process already is (especially for those lacking a solid support network). As such, he has worked hard to make it as uncomplicated as possible on his own end.

The procedures available from Dr. Mardirossian's office, [Palm Beach Plastics](#), include (along others): brow lift, forehead contouring, hair restoration, voice feminization surgery, tracheal shave, jaw shaving and reduction, hairline advancement, [mandible contouring](#), face lift, neck lift, dimpleplasty, and chin shaving and implants.

Women have more delicate facial features than men do. Men are often more rugged, with more defined jaw lines and a higher forehead due to a hairline which begins higher than women's. Men also tend to have deeper voices, and an abundance of facial hair, not to mention the tell-tale Adam's Apple, which women do not have. All of these can be altered at Palm Beach Plastics.

Everybody's journey to revealing their true selves is different, so it is only appropriate the procedures needed will also vary from person to person. Here, however, is a small peak into what may be in store when undergoing FFS:

An important first step is the tracheal shave, which reduces the noticeability of an Adam's Apple. Jaw shaving can then make your jaw appear softer and more feminine. Hairline advancement surgery can bring the hairline forward, thus decreasing the height of the forehead simultaneously. For men who may have thinning hair or who are going bald, the solution is hair restoration surgery. Finally, voice feminization surgery can assist in increasing the pitch to a more feminine tone.

All these procedures can be done at Dr. Mardirossian's office. It is truly a one stop shop for all FFS needs.
