The main cause of atopic dermatitis is unknown but it is assumed to be caused due to genetics, dry skin and environmental conditions. Multiple factors can trigger or worsen atopic dermatitis, including low humidity, seasonal allergies, exposure to harsh soaps and detergents, and cold weather. There has been no specified biologic till now for atopic dermatitis. But recent efforts by many companies have shown positive results and the first biologic may get launched in 2017. After that many other products are still in pipeline.

The key factors which are anticipated to drive atopic dermatitis market include increase in global population, improvement in the global health care expenditure, accelerated economic growth, pollution and climatic factors and role of triggers. Some of the significant developments of this industry include introduction of new biologics, biomarker in atopic dermatitis and opportunity for new entrants. However, the challenge to be faced ahead is time to be taken in drug adoption, high price and legal regulations.

This report offers a comprehensive analysis of the atopic dermatitis market. Furthermore, market dynamics such as key trends and development; and challenges are analyzed in depth. On the contention front, the global market is reined by few major players namely Sanofi, Glaxo Smithkline (GSK), AstraZeneca and Roche Holding. The competitive landscape of the respective market, along with the company profiles of the leading players are also discussed in detail.
