

Ascites Market - Disease Assessment and Therapeutics Analysis Forecasts to 2024

PUNE, INDIA, April 20, 2018 /EINPresswire.com/ -- WiseGuyReports.com with their unique quality of simplifying the market research study, presents a deep diving study report "Global Ascites Market Research Report - Forecast to 2023"

Ascites

Overview

Ascites is an abnormal accumulation fluid in the abdominal cavity. Liver cirrhosis is the most common case of ascites. Its presence is a sign of significant portal hypertension. Other less common factors that may contribute to ascites development are heart failure, kidney failure, cancers, and infection in pancreas. Ascites is a major complication of cirrhosis and is also an important landmark of chronic liver disease in the natural history.

The rising alcohol consumption directly leads to the rising hospitalized cases and mortality due to alcoholic liver cirrhosis. Rising prevalence of cirrhosis and its related complications directly promotes the growth of ascites market.

The global ascites market is expected to reach USD 3710.4 million by 2023 from USD 2806.1 million in 2016. This market is expected to grow at a stable CAGR of 4.0% during the forecast period d 2017-2023.
