

The company Midex collected more than \$20 mln during the tokensale.

The Midex tokensale is over after 90 days. During this period, 20 million tokens were sold at a price between \$1 and \$1.20.

TALLIN, ESTONIA, April 20, 2018 /EINPresswire.com/ -- The Midex tokensale is over after 90 days. During this period, 20 million tokens were sold at a price between \$1 and \$1.20 and the number of transactions on the site reached 7 million.

According to CEO of Midex Dmitry Machikhin, the availability of a working product - a licensed cryptocurrency exchange, a presence of a powerful international team and transparent company structure allowed for a successful tokensale. In the last month, there were MDX tokens sold instantly. In addition, during tokensale, Midex visited 20 cities in different countries of the world (including the US, Great Britain, Singapore, Japan, Hong Kong), to meet with the community, investors, partners, and regulators.

The exchange - the main financial Midex platform - will launch in May 2018. At the moment, the cryptocurrency exchange is in final testing.

Midex Exchange is a fully licensed platform for performing all types of operations with cryptocurrency. Midex has a license in Estonia. Moreover, the company is preparing to obtain a license in the UK and Japan soon. To create Midex Exchange attracted a powerful international legal team, bankers and people with an impeccable reputation in the blockchain world.

The main advantage of the Midex Exchange is its own unique software with a performance of 1.5 million orders per second. Also, very soon it will be possible to conduct more than 100,000 bargains per second with the opportunity to record all transactions made on the exchange. It will allow absolute transparency of the bidding process to be achieved.

Midex Exchange is the first service, which allows working with cryptocurrency exchanges using only one interface and private API keys.
