## Global Bio-based Acrylic Acid Market

WiseGuyReports.com Presents "Global Bio-based Acrylic Acid Market 2018 by Manufacturers, Countries, Type and Application, Forecast to 2023" New Document to its Studies Database. The Report Contain 104 Pages With Detailed Analysis.

### Description

The acrylic acid industry has seen significant change over the past two decades. With the closure of acetylene-based and acrylonitrile-based plants in the 1990s, the production of acrylic acid via two-stage propylene oxidation became the preferred and dominant method of production for acrylic acid producers, globally. Currently, licensors and technology holders of two-stage propylene oxidation technology are looking to improve their processes with new catalyst formulations, modifications to reactor design, and/or establishing operational best-practices through newly optimized parameters. The next decade, however, will give rise to a new wave of technologies – particularly, bio-based routes to acrylic acid.
