RAJKOT, GUJARAT, INDIA, April 23, 2018 /EINPresswire.com/ -- [Alphanso tech](#) a robust mid-market software development company has developed an [event management software](#) using Laravel framework. today announced the release of its Android and iOS app for Event Organizer. This module enables event organizer to manage their event from their mobile phones. The event organizer can scan the ticket with the QR code on their mobile phone and can check the event statistics.

Technology underneath plays a very important role when you make the large-scale application. Eventz is built on top of very popular LAMP stack. We have used Laravel MVC framework for coding and Twitter's Bootstrap for UI design. We took care of two core things. The code that responds, load website fast and the design that is easy to understand and use.

"We are very happy to provide our clients with a tool to manage their event very efficiently and smoothly", said Gaurav Kanabar, Director of Alphanso Tech. "EventZ enables startup and entrepreneurs to growth hack their event management business".

Event Booking application saves time and energy to help entrepreneurs focus on their core business instead of worrying about the backend operation.

EventZ – Event Management System has features like Event Creation, Event Booking, Multiple ticket type creation, Ticket QR Code, Event Organizer app etc. "It is essential to have a great UI/UX
