

Pearl Technologies to Unveil Several New Packaging Products, Live Demos at NPE 2018

Innovative design improvements create safer working environment in high volume production lines

SAVANNAH, NEW YORK, USA, April 23, 2018 /EINPresswire.com/ -- Savannah, New York – April 23, 2018 – Pearl Technologies will be showcasing several new packaging products accompanied with

live demos in its booth at this year's NPE. The new products are aimed at increasing converter line productivity, product quality and safety.

Innovation is the DNA of Pearl Technologies and it will be on display at this year's NPE."

Laurent Cros, CEO of Pearl Technologies

"Innovation is the DNA of Pearl Technologies and it will be on display at this year's NPE," said Laurent Cros, CEO of Pearl Technologies. "We are showcasing several new products that create value for our customers addressing the need for continued productivity gains while improving worker safety. Our new units will be available for testing in

the booth using customer-specific material for a first-hand demonstration that highlights ease-of-use and new safety features."

Pearl's innovative solutions will be on display at NPE 2018, May 7-11 Hall E, Booth W8292 in Orlando, FL. This year, a brand-new show cart will exhibit the featured products, all of which will be available for demonstrations and testing.

New products include:

Bubble guide digital control and readout

The bubble guide control unit features a simple touch screen control box that lets extruders remotely adjust the diameter of bubble guides. The system can also store recipes and can be purchased with a new bubble guide or retrofitted onto existing Pearl guides and cages.

Double sided Flex Sealer

Pearl's intermittent Flex Sealer is ideal for sealing poly bags or pouches in the bag making process. The Flex Sealer has conveniences similar to a Pearl Flex punching unit, including the ability to change sealing style, pattern, shape or size. Sealer modules can be swapped in seconds to change the pattern or for cleanup allowing converters to continue production during maintenance. Pearl's Flex Sealer is great for gusset sealing applications, reinforced handle seals, angle seals, security seals, pre-sealing, heat crimping and more. Available in side rail or cross rail, carriages are optional. Flex Sealers can also be converted into Flex cutters.

Double Center Pivot Punch

Capitalizing on the success of Pearl's patented pivot punch technology, the Double Center Pivot Punch unit allows users to punch holes very close to each other (1") without needing multiple rails. The unit features the new center pivot allowing converters to benefit from the durability and quality of Pearl's punches for continuous motion applications.

Lightning Multi-Punch Unit

Utilizing the lightning technology, widely used in wickets application, this complementary design offers the convenience of very fast changeovers, tool-less lateral adjustment, and the optional

safety box , which prevents the exposure of the punch teeth during changeover.

Other featured products will include large diameter Ball and Die, UltraFlex HD, Flex 3, Lightning Wicket with Safety Enclosure and a full set of extrusion solutions and line enhancements.

Call or email Pearl today to book an appointment. If you are unable to attend the show, contact a sales representative and ask about our Applications Lab. Pearl can pre-test materials or samples on our lab equipment and help determine what product is right for your application.

About Pearl Technologies, Inc.

Pearl Technologies is a leading supplier of precision converting products for the global flexible packaging and blown film industries. Pearl's products are recognized for improving worker safety and driving greater throughput in the line delivering lower cost of ownership. Key products include a wide variety of punches, slitters and perforators, punching attachments for wicketing, handle holes, hanger holes, and venting attachments. Founded in 1985, the company is headquartered in Savannah, New York, and ships its products to customers in over 35 countries worldwide. For more information visit www.pearltechinc.com.
