# VS Security Products offer data auditing software for GDPR compliance

LOS ANGELES, CALIFORNIA, UNITED STATES, April 26, 2018 /EINPresswire.com/ -- VS Security Products today announced its latest range of [degaussers](#) will be shipped with auditing software to help businesses develop accountability for data compliance in relation to the European Union's new GDPR law. __

The General Data Protection Regulation (GDPR) legislation, which comes into effect this May, will have a profound impact on how businesses process data. The EU's new legislation will enforce rules on how data is handled and companies that fail to comply will be fined up to €20 million euros or 4% of total global turnover depending on the severity of infringements related to areas such as the security of processing data, how data is integrated by design, personal data breaches, processing activities, and the individual rights of data subjects.

_Multinational corporations with operations in the European Union have been updating their internal policies on data handling to comply with the new regulation which will also give individuals the right to claim compensation from businesses in breach of GDPR rules. __

VS Security Products has been updating its latest range of degaussers including the popular DataGauss LG to come equipped with auditing software so that businesses can verify data destruction and provide accurate audit reports of data erasure for GDPR compliance and data handling.
_
"There is a clear concern for many businesses on the issue of GDPR compliance and how to provide accurate reporting to show proper data handling and disposal. We wanted to make sure our customers have access to auditing capabilities so that they are able to provide authorities transparent, and accurate reports of their data handling processes moving forward," - David Tucker, Managing Director, VS Security Products. __

Operating in more than 30 countries, VS Security Products provides [degaussing](#) and data destruction machines to some of the world's largest broadcasters and government agencies who require secure data erasure for hard drives, servers, beta cassettes and SSD flash drives. __
The EU's new GDPR law will be enforced May 25th in all EU member states including the U.K. which is set to leave the European Union in March 2019. __

About VS Security Products __

VS Security Products design, manufacture and sell the most extensive range of degaussers and data destroyers in the world, providing solutions for secure data erasure of any magnetic media, approved by the NSA and NATO. __

With over 30 years' experience in designing and manufacturing degaussers, previously under the Verity Systems brand, VS Security Products provides businesses and government agencies with machines that can securely erase data from hard drives, backup tapes, broadcast audio and video tapes - which can then be safely recycled. Solutions also include machines capable of the physical destruction of hard disks and solid state drives. Auditing software is also provided with degaussers for data compliance and handling. __

Customers worldwide are supported by a global distributor network to ensure that a high standard of customer service is achieved and technical support is provided internationally. __
