Among the product type, body repair and construction held the largest market share due to high demand for arthroscopy devices. Increasing transition from conventional open surgeries to minimally invasive surgeries presents considerable growth of this segment in the forecast period. Besides this, the ongoing R&D innovation and product upgradation strategies taken up by key players, and the technological advancement in surgical equipment are expected to boost the growth of sports rehabilitation market.

Increasing Focus of Towards Injury and Trauma Related Wounds to Drive the Market in North

America

North America is expected to hold the major market share over the forecast period.

Advancements in the healthcare domain and growing focus of healthcare providers towards injury and trauma-related wounds is driving the market growth. Nearly 1.35 million youth are found to suffer from sports injuries every year. Government initiatives such as the American Orthopedic Society for Sports Medicine (AOSSM), American Medical Society for Sports Medicine (AMSSM), National Athletic Trainers Association (NATA) and Canadian Athletic Therapists' Association (CATA) is estimated to drive the growth of the sports rehabilitation market.
