## Market Insights

The global Risk Analytics market is estimated to grow at a CAGR of 13.2% from 2017-2022. Risk analysis has become an important tool in recent time with more number of companies opting for risky investments. Hence, study of compliances, feasibility and risk analysis on various hierarchy levels in an organization have become extremely important. According to the OMR analysis, the market growth is attributed to various factors such as increasing competitive pressure on small and medium enterprises and supportive government regulations and policies. Enhancement in technology and innovations in cloud services are also propelling market growth. Besides this, increasing need to minimize risks in businesses and to avoid losses incurred due to risks are a few factors adding to the market growth. Increasing adoption of cloud based services and advanced technologies in risk analytics market has given rise to a lot of opportunities in this market. However, data security and privacy concerns and requirement of huge investments act as major growth inhibitors for the market.
