Extremely cost effective light weight modular booths require less space than thick wall CMU or precast concrete construction. This results in a smaller geometric site foot print and lighter foundation requirements. Site work is performed by local trades while simultaneously, booths are being custom manufactured. Setting of booths is quickly accomplished using fork lifts. Local trades are utilized for utility hookups. The use of modular booths can dramatically reduce completion time. Factory built booths reduce site traffic and greatly reduce safety issues associated

with conventional construction.

M.R. Secure Sales LLC also represents leaders in Modular Steel Jail and Prison Cells, Offsite Sustainable Construction of Steel and Concrete Multi-Story Modular Schools, Dorms, Condos, Town Houses, Senior Housing, Hotels, Retail Stores, Emergency Care Facilities, Equipment/Telecommunication Shelters, and Miscellaneous Metal Fabrication.
