

High Resolution/High Fidelity Media Servers Unveiled by Ace Computers

Ace Computers media servers offer an optimal combination of scalability and flexibility at a highly competitive price.

CHICAGO, UNITED STATES, May 17, 2018 /EINPresswire.com/ -- Multiple Consumer Electronics (CES) Show award winner Ace Computers just introduced high resolution/[high fidelity media servers](#). These are the perfect solution for applications that include live entertainment, theater, worship, education and more. Expertly engineered for rugged reliability and designed for fast, simple set-up, Ace Computers media servers offer an optimal combination of scalability and flexibility at a highly competitive price.

All Ace media servers—which range from high end to entry level—are available with an array of the most sought after features and offer the option of onsite service.

Ace MMS Pro and MMS AV are two of the quietest, most powerful and flexible solutions Ace Computers offers. These servers feature:

- High-end chassis
- High definition audio with 120dB SNR HD audio
- ESS Sabre DAC on motherboard
- 500GB M.2 PCI-Express SSD drive for OS for the ultimate in performance
- Can accommodate up to two 1TB M.2 SSD drives
- Rip bit-perfect CDs, DVDs, or Blu-Ray discs (3rd party software required)
- Store and play any high-resolution audio format at highest sampling rates
- Quad Intel Gigabit gaming quality NICs and optional Wi-GIG Tri-Band WIFI card
- 3 simultaneous displays, with 2 ports capable of 4K (HDMI/DP)
- Compatible with multiple cable and over-the-air tuners

Ace CEO John Samborski
