[Joint Reconstruction Devices Market 2018](#)

Joint reconstruction is a surgical procedure for rebuilding the architecture of the damaged joint to reduce the patient's pain. This is done by implanting devices to replace, reconstruct, or fixate injured or diseased joints and bones of a joint. Based on the severity of the joint damage, the joint reconstruction ranges from minor repairs to the joint to total joint replacement.

The analysts forecast the global joint reconstruction devices market to grow at a CAGR of 4.74% during the period 2018-2022.
