PUNE, INDIA, May 24, 2018 /EINPresswire.com/ --

The analysts forecast the global 3D glasses market to decline at a CAGR of 4.47% during the period 2017-2021.

3D glasses offer stereoscopic appearance of images. The viewing or appearance of the objects is as if in three-dimensions. In 1838, Sir Charles Wheatstone developed the first 3D viewing device called stereoscope by applying the principals of stereopsis. The stereoscope was a flat board fitted with mirrors and lenses and was enhanced by removing mirrors to make the view easier through lenses. This resulted in a device called lenticular scope, which was the first portable 3D viewing device.
