

Global Vendor Neutral Archive market Report, Trends, Size, Share, Analysis, Estimations and Forecasts to 2023

Global Vendor Neutral Archive market Report, Trends, Size, Share, Analysis, Estimations and Forecasts to 2023

PUNE, MAHARASHTRA, INDIA, May 28, 2018 /EINPresswire.com/ -- Vendor Neutrality Archive (VNA) is a step further of PACS (picture archiving and communication systems) and the concern of vendor neutrality (freedom from vendor imposed limits) is of prime importance in VNA. Picture Archiving and Communication System (PACS) is a medical imaging technology which enables easy storage and access to images in a digital way. PACS has a capability to handle images from different medical imaging equipment such as positron emission tomography (PET), endoscopy (ES), ultrasound, magnetic resonance, radiography, mammograms, etc.

Based on the mode of delivery, the global VNA market has been segmented into on-premise VNA, hybrid VNA and complete cloud-hosted VNA. On-premise VNA segment is a leading segment among the market owing to its enhanced data control and security. However, high expenditure cost and availability of an alternate economical option of cloud-based VNA are expected to impede the global market growth for on-premise VNA. The global PACS market can be segmented by components which include, hardware (access devices, peripherals, servers, storage devices and network devices), software and services (consulting, implementation services, post sales & maintenance and training services).

Key Players:

Siemens Healthcare, Acuo Technologies, Agfa HealthCare., BridgeHead Software Inc., Carestream Health Inc., Dejarnette Research Systems, Inc., Dell Inc., EMC Corporation, Fujifilm Corporation, GE Healthcare, IBM Corporation, Mach 7 Technologies, McKesson Corporation, Merge Healthcare Inc., Novarad Corporation, Philips Healthcare, TeraMedica Inc.
