- Sync Interactive

The augmented reality allows computer-generated content to be superimposed over a live camera view of the real world. The virtual reality is said to be realistic and immersive simulation of a 3D surrounding experience generated by a computer. With this technology, one could feel they are inside the imaginary world.

In business, the AR & VR technology have been used in an impressive manner for training, conference, virtual tours for the hotels and travel industry as well as for online shopping. For example, Sephora has an AR app that permits you to capture a snap chat style real-time image of

your face where you can try on more than 2500 lipstick shades. With the help of AR app you can take a look how it will look on you and which will suit you best.
