

# Capital Numbers Moves to A New, State-of-the-art Office

*In May 2018, Capital Numbers migrated its operations to a new office. One immediate benefit to clients will be state of the art security.*

KOLKATA, INDIA, May 29, 2018 /EINPresswire.com/ -- In May 2018, [Capital Numbers](#) migrated its operations to a new office.

Based in the emerging corporate hub in Kolkata, the new office and infrastructure represents a great step forward in the services, security, and convenience the company can offer its clients.

One immediate benefit to clients will be state of the art security. The new infrastructure, with its robust system of firewalls, intrusion detection methods, and monitoring systems, is complemented by another layer of physical security, including identity cards, access-controlled premises, and professional guards.

“

We believe in making our place a hub of activity, energy and positivity, because only happy employees can lead to happy clients.”

*Mukul Gupta, CEO*

In addition, the new office also offers superior project management systems - not only digitally but in terms of the office design. This approach to management ensures development is always moving along, projects are completed on time, products are launched according to deadlines, and clients can expect short turnaround cycles.

Finally, with a capacity of 16000 Sq Feet / 1487 Sq Meters , the layout offers developers the freedom to do their best work. Open and strategic seating plans give the developers plenty of creative space, and small collaborative niches allow them a place to meet informally to discuss their work.

Founder and Managing Director Mukul Gupta said that he firmly believes that none of Capital Numbers’ competitors can compete with their new infrastructure. He expects this new facility to foster creativity, innovation, and collaboration.

“Instead of focusing on just being big, we focus on being really good at what we do,” said Gupta. “Our state of the art infrastructure is a major contributing factor to our growth. Equipped with technology on the cutting edge – powerful servers, communication and backup systems, we ensure uninterrupted services and short turnaround cycles. We believe in making our place a hub of activity, energy and positivity, because only happy employees can lead to happy clients.”
