

Industry-Leading Disaster Recovery (DRaaS), Data Protection Powered by Veeam Announced by ITsavvy

ITsavvy, one of the fastest growing complete cloud solution providers in the U.S., just announced DRaaS (disaster recovery as a service) powered by Veeam.

ADDISON, ILLINOIS, UNITED STATES, May 30, 2018 /EINPresswire.com/ -- ITsavvy, one of the fastest growing complete cloud solution providers in the U.S., just announced [DRaaS \(disaster recovery as a service\)](#) powered by [Veeam](#).

Together, Veeam's Cloud Connect VM backup and replication and ITsavvy's cloud infrastructure provide a fully integrated, fast and secure cloud-based DR. Because ITsavvy is a Veeam Cloud Service Provider, clients can easily and securely point their Veeam backup and replication jobs to ITsavvy's cloud infrastructure. ITsavvy's President and CEO Mike Theriault said, "Veeam is a key partner for us that brings significant additional value to the leading-edge cloud services that we already provide. Our goal is to offer a continually evolving suite of cloud solutions that keeps our clients ahead of the competition." Most organizations outsource the responsibility of performing and monitoring backups—for reasons that include efficiency and effectiveness. Also, they may not have the internal skill set to manage backup solutions. The ITsavvy/Veeam managed solution is the ideal answer. Veeam leverages clients' investments in virtualization and extends these assets to adopting cloud strategies for data protection.

Affordable and efficient image-based VM replication delivers true cloud-based disaster recovery for most client workloads (with recovery time and point objectives in less than 15 minutes) through

ITsavvy-branded savvyCloud and savvyBackup.

ITsavvy's savvyCloud IaaS (infrastructure as a service) solution offers infrastructure and computing capabilities that are hosted in the cloud at an offsite data center. Clients receive space in a private or public cloud where they can install software and migrate data. ITsavvy hosts and maintains hardware, servers, storage and other components. Clients also gain on-demand capabilities that can be scaled up or periodically turned off--paying only for what they are using. ITsavvy's experts provide 24x7x365 support and NOC monitoring.

ITsavvy President and CEO Mike Theriault

“

Our goal is to offer a continually evolving suite of cloud solutions that keeps our clients ahead of the competition.”

ITsavvy's comprehensive or customizable savvyBackup solution streamlines backups, secures files

and applications, and restores data seamlessly. Working with Veeam, clients retain control of their data onsite or have the option of letting ITsavvy's expert engineers completely manage their data protection.

ITsavvy monitors, manages, and supports the entire savvyBackup infrastructure on the client's behalf. The

backup is directed to a Veeam Cloud Connect repository which is fully integrated, fast and secure with

Veeam's backup and restore functionality. This reduces risk and enables offsite backup access.

Veeam solutions also provide support for Microsoft Office 365 to enable backups of emails as well as documents that are hosted in OneDrive.

ITsavvy is a leader in tailored, end-to-end IT product and service solutions. ITsavvy built its reputation as a value-added reseller with industry-leading product availability, design and implementation, client support and delivery speed through 46 distribution centers across the U.S. ITsavvy also has data center locations in Cedar Knolls, N.J. and Oak Brook, Ill. The company's user-friendly website provides concise, leading-edge IT decision-making resources, including an

e-commerce site with real-time pricing and availability. ITsavvy is headquartered in Addison, Ill., with offices in Chicago's Loop; Hauppauge, N.Y.; New York, N.Y.; Naples, Fla.; Miami; Indianapolis; Warren, N.J.; Davenport, Iowa; Hayward, Calif.; and Beavercreek, Ohio.
