

# Analysts exhibiting at ProcureConIT Sourcing event

DULUTH, GEORGIA, UNITED STATES, May 31, 2018 /EINPresswire.com/ -- Analysts, part of ACS Group, a pioneering leader in providing IT Consulting and Solutions globally will showcase its groundbreaking innovation during ProcureConIT in Denver, Colorado, June 19-21, 2018.

Technology exists to enable business growth, and what we see today is a tremendous opportunity to rise."

*Vijay Rajan, Principal  
Technology Director for  
Analysts*

ProcureConIT is the premier event for interactive, peer-led discussions for senior-level procurement practitioners. For over 10 years, ProcureConIT has been instrumental in helping companies transform their programs through workshops and intimate networking sessions.

This year's attendees are invited to drop by and meet with Analysts skilled and knowledgeable team members at our workshop on Tuesday, June 19th at 3:30 pm. Vijay Rajan, Principal Technology Director, for Analysts IT Solutions will be presenting to give attendees the opportunity to capture a

better understanding of how to enable businesses to achieve peak performances by leading game-changing business and technology transformations that deliver rapid growth and ROI.

Through our workshop, attendees will develop a better understanding of technology's role in IT talent sourcing and how to utilize it to reap the largest rewards. "Technology exists to enable business growth," said Vijay Rajan, Principal Technology Director for Analysts. "And what we see today is a tremendous opportunity to rise, as an organization, to leverage our combined capabilities and deliver on initiatives that transform our communities, our clients and how we do business."

Analysts has adapted and grown with our clients. Today, this expertise spans technology and development, implementations and integration services and includes specialized skills in areas of great demand ranging across smaller, strategic projects to enterprise-wide initiatives. Our core competency in Application Solutions, Enterprise Information Management, Cloud Services, Infor/Lawson ERP, Secure Information Sharing, and QA/Testing is backed by domain expertise and service delivery options tailored to our clients' needs.

With the greater use of Managed Service Programs (MSP) and Vendor Management Software (VMS) to manage, engage, and source staff augmentation contractors, the pressure to manage costs, drive quality and maintain IT project delivery has become a greater challenge within IT and procurement organizations.

Our Workshop, "Bridging the Gap Between IT and Procurement: Managing Cost with the Right IT Talent Sourcing Strategy," is aimed at finding new and innovative strategies to do more with less. We will discuss how the implementation of a multi-sourcing strategy for SOW and Staff Augmentation enabled the IT organization to drive on-time and on-budget project delivery using a multi-sourcing strategy approach.
