

Trak Fertility to Sponsor the 2018 Drive For Men's Health

Fifth Annual Cross-Country Event Aims to Increase Awareness of Men's Health Issues and to Encourage Men to Make Their Health a Priority

LIVERMORE, CA, US, June 1, 2018 /EINPresswire.com/ -- Sandstone Diagnostics – makers of the [Trak® Fertility](#) suite of male reproductive health products – proudly announces its sponsorship of the 2018 Drive for Men's Health™.

The Drive for Men's Health is an annual cross-country journey that builds awareness for men's health issues and encourages men to make their health a priority. Led by Urologists Jamin Brahmbhatt, M.D., and Sijo Parekattil, M.D., the 2018 Drive runs from June 1-9 with stops and public events in Orlando, New York City, Philadelphia, Columbus (OH), Chicago, and Houston.

"We're proud to continue our support of the incredible work Dr. Brahmbhatt, Dr. Parekattil, and the entire Drive for Men's Health team are doing to help men think about and address their personal health in innovative ways," said Sandstone CEO Karen Drexler. "Health and fertility can be difficult topics for men to discuss; it's inspiring to see the attention and following that the Drive has created, and we're very excited to continue to be a part of it."

The 2018 Drive will focus especially on diet and nutrition, with free events at public markets featuring local chefs showing how simple it can be to make healthier nutrition decisions at home or on-the-go.

"Trak has been a game changer for men's reproductive health and we are thrilled to have their continued support for the Drive," said Dr. Brahmbhatt. "Helping men test and manage their fertility has always been a challenge for urologists. Trak allows men to test their sperm count at home and pursue health and lifestyle changes that can bolster not only their fertility, but also help men live longer and healthier lives."

Trak will be releasing additional educational resources throughout June to help raise awareness for the links between men's fertility and overall health for Men's Health Month.

About Sandstone Diagnostics

Founded in 2012 in part by government scientists from Sandia National Laboratories, Sandstone's mission is to provide innovative, data-driven tools to help men assess, manage, and improve their reproductive health. We are a team of scientists, developers, health and business professionals. We are also proud members of the Startup Health and Stanford StartX accelerator programs. But most importantly we are fathers, mothers, brothers, sisters, and friends who care deeply about improving

men's reproductive health and helping people start their families. For more information, visit trakfertility.com, and follow us on Facebook and Twitter @TrakFertility.

About the Drive for Men's Health

The Drive for Men's Health (D4MH) aims to increase awareness of men's health issues and to encourage men to make their health a priority. Throughout the country, men are encouraged to be more active, eat healthier, get better sleep, quit smoking, and decrease stress. As urologists, Dr. Brahmbhatt and Dr. Parekattil also drive awareness surrounding chronic groin and testicular pain, post-vasectomy pain, post-inguinal hernia pain and male infertility. 2018 marks the fifth year of the D4MH, with planned stops in Orlando, New York City, Philadelphia, Columbus (OH), Chicago, and Houston. For more information, visit <https://driveformenshealth.com/>. Follow along on social media at Facebook, Twitter, YouTube and Instagram.
