

# The Question is if I Lay Out the Solutions, Will Our Lawmakers Listen?

*We need a Senate hearing on why America is slipping behind other nations and on what actions we need to take to keep forging ahead of the rest of the world.*

WASHINGTON, DC, UNITED STATES, June 2, 2018 /EINPresswire.com/ -- Dear Lawmakers: Please ask yourselves why relationships, the education mess, the crime situation, the drug addictions and all the other man-made ills of society are all as ill as ever.

The advertisement features a blue background with a white grid on the left showing levels: Guru (+2), Adult (+1), Child (-1), and Fetus (-2). To the right is a large question mark and the text "BRAIN POWER CLUB™ WHICH LEVEL OF THE MIND ARE YOU COMING FROM?". Below this is a "Mind Brain" logo with a cartoon brain character. Further right is a "Mission Statement" box with a speech bubble icon and the text "Providing you with an effective new innovation of your brain and mind observing each other from an inside in perspective." and "Wisdom power is your (+2) guru/emotionally-healthy self-image power." At the bottom, a white box contains the text "Wisdom is now a science when defined as humility!"

Please either prove me wrong or let me show you how to remove the current mess in education and in society.

“

At the last Senate Hearing for rural health, the experts proposed the same old solutions, that leave the fundamental cause for this mess in society - the absence of testing Emotional Health in place.”

*Sajid Khan*

We need to have a Senate hearing on why America is slipping behind other nations and on what actions we need to take to keep forging ahead of the rest of the world. Not only can we reverse this trend, we can become greater than ever before.

America, as we know it as a world leader, is in danger. We are no longer leaders in several fields.

The main cause why America is slipping is not even on the radar screen of our experts. As a result, we will continue to lose ground to other nations, especially China. We are still

ahead in Mind Education but in [Brain Education](#), we are already behind.

The cause is very clear, our country is continuing to produce a majority of emotionally challenged brains. As a result, America is an emotionally challenged society.

The related problem is that our drug manufacturers have realized that it is far more profitable to sell tranquilizers and keep people on drugs than to cure the various ills of society.

Another problem is our experts continue to try to fix the symptoms rather than heal the disease.

In spite of all the negatives, America will remain almighty as long as our \$ remains almighty. Even this is changing. All foreign trade was 100% in our currency. Today it is about 80% and is gradually declining. Once it hits below 50% all hell will break loose. We will no longer be able to spend beyond our means and there will be hyperinflation.

I attended the last Senate Hearing for rural health. The experts are proposing the same old [solutions](#)

that will leave in place, the fundamental cause for this huge mess in society - the absence of testing Emotional Health. So not much will change and America will keep slipping towards bankruptcy in all aspects of life.

Unless focus is shifted to Emotional Health the situation will keep getting from bad to worse.

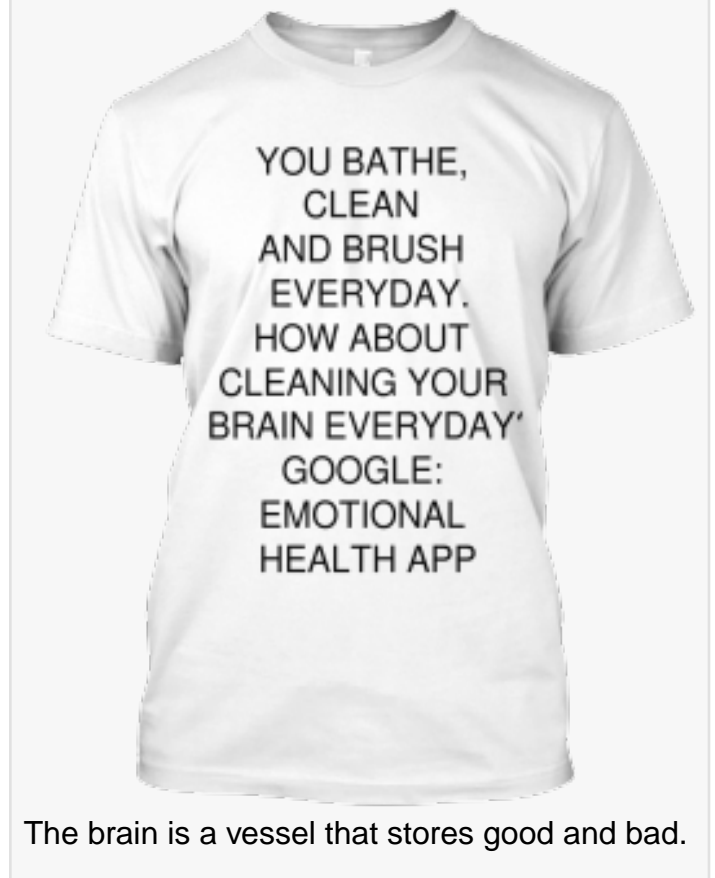

Our leaders must realize that if they do not act now they will be responsible for a diminished future for our children and the loss of American leadership.

The Question is if I lay out the Solutions, Will our Leaders Listen?
