The company's equity [Crowdfunding](#) campaign, which is open for immediate investments here on StartEngine.com platform, let's anyone regardless of their background or location invest even small amounts in the company's future. Ever since Title III of the JOBS Act was implemented by the SEC in May 2016, many startups have found this new way of fundraising to be extremely powerful for their companies.

Some [investor](#) groups like [Angel Investors](#), Accredited Investors, High Net Worth Investors, Institutional Investors and every day people may benefit from Farr Hotels & Resorts Crowdfunding Platform on StartEngine.com

Unlike other traditional crowdfunding such as Kickstarter or IndieGoGo where backers may receive a t-shirt or gift rewards for their donation – the supporters of equity crowdfunding platforms such as StartEngine become actual investors who with a few clicks can directly purchase shares and units as issued by the startup. Gone are the days of having to be part of the one percent - accredited investors with a huge bankroll just for the privilege of investing.

Companies such as Farr Hotels & Resorts and their fans can now both mutually benefit from fundraising this way. The company is also offering up several perks to investors at various levels, which can be seen on their campaign page <https://www.startengine.com/farr-investment-capital-inc>.

Going through the due diligence process in order to raise funds this way certainly took a lot of time, and there was understandably a lot of paperwork and approvals we had to pass in order to meet the legal requirements to offer up equity to the public”, adds Ken. “But I’m glad it works this way because it also gives confidence to all investors that we have met all the criteria for accepting investments – and it really is a great opportunity for people to become part owners along with us. Unlike banks and lenders, who really could care less if you succeed or not as long as they get their money back – people who invest and get equity literally have a stake in the game and will also be on your team wanting you to succeed. This is an overlooked benefit that I think more startups should consider with this type of funding.”
