

Balding and Prostate Cancer: Lilac Corp reviews a study and recommends Nolopecia, a natural treatment against hair loss

Lilac Corp reviews a study that tested a possible link between early hair loss and prostate cancer.

SARASOTA, FL, UNITED STATES, June 6, 2018 /EINPresswire.com/ -- A study showed that men with very early onset [balding](#) are more likely to develop aggressive prostate [cancer](#), and at a younger age [1]. Some prostate cancers are more dangerous than others. Prostate cancer and androgenic alopecia, also called male pattern baldness, are both dependent on androgen hormones.

The study surveyed 1,941 men and found that men balding at age 20 years had a 50% higher chance of developing aggressive prostate cancer. Also, these men were diagnosed with cancer an average of 16 months earlier than non-balding men. Men balding at age 40 years and older, or non-balding men did not have the increased risk. Research like this is important because it helps to identify groups of men with higher risk for aggressive cancer. Men who are at a higher risk can perform regular screening tests for prostate cancer and should be followed up closely with their doctor.

“

Nolopecia, targets the latent viruses in the body. This helps the body maintain a normal level of the 5alpha-R, DHT, and AR proteins. A normal level of these proteins stimulates hair growth.”

Lilac Corp

of these proteins stimulates hair growth.

All natural hair loss supplement sold by Lilac Corp

For men (and women), who suffer from [hair loss](#) and balding, Lilac Corp recommends the natural treatment Nolopecia. Lilac Corp is the company that invented the highly effective and unique antiviral natural treatments Gene-Eden-VIR and Novirin. For more information on these products, search Google. The search will produce the clinical studies that tested the treatments.

The new treatment, called Nolopecia, targets the latent viruses in the body. This helps the body maintain a normal level of the 5alpha-R, DHT, and AR proteins. A normal level

There are many treatments for hair loss on the market. However, only Nolopecia targets the latent viruses that cause the increase in 5alpha-R, DHT, and AR observed in people with hair loss and balding.

About Lilac Corp:

Lilac Corp specializes in the development of biology-based patent protected natural treatments. Currently, Lilac Corp is selling four products: Gene-Eden-VIR, Novirin, Nolopecia, and Noacnin. Lilac Corp ships its products to more than 100 countries around the world. What makes Lilac Corp special is

that all its products are tested in clinical studies that follow FDA guidelines. To ensure transparency, the results of the clinical studies are published in leading scientific journals. Lilac Corp also offers a 90-day money back guarantee.
