IT Governance launches single policy templates for implementing an ISO 27001 project

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, June 8, 2018 /EINPresswire.com/ -- Ely, United Kingdom, 8 June 2018 – IT Governance, the leading provider of ISO 27001 compliance solutions, unveiled the first of its ISO 27001 template policy products with the ISO 27001 Information Security Template today.

This customisable template, which has been developed by IT Governance's expert ISO 27001 practitioners, makes it quick and easy for organisations to create an ISO 27001-compliant information security policy, enabling them to adhere to all the Standard's requirements.

Alan Calder, founder and executive chairman of IT Governance, said: "Creating a policy for complying with ISO 27001 can seem like an arduous and prolonged process for many. However, these templates take the hassle and time-consumption out of this task. Once again, we look to broaden our range of high-quality solutions to our international customer base and continue to lead ISO 27001 implementations – something we have been doing since the introduction of the Standard."

As part of an ISO 27001 implementation project, organisations must develop and document an information security policy. However, many are unsure of what this must include or where to start. IT Governance's latest offering looks to simplify this challenge and help organisations create one in minutes.

Organisations wishing to take full advantage of IT Governance's experience and expertise can opt for its ISO 27001 bespoke consultancy. This service is offered through any combination of hands-on or in-house consultancy, or remote mentor and coach consultancy support, to fit each organisation's business needs and requirements.
