## [Tallow Fatty Acid Market 2018](#)

Fats and oils are a combination of two different types of fatty acids- saturated and unsaturated; the latter include monounsaturated and polyunsaturated fats. Both of these belong to a group with biological substances, known as lipids. Lipids serve different types of functions in organisms, including hormonal functions and structural components of membranes. In addition, they function as energy storehouses. The common difference between fats and oils is that fats remain in the solid state at room temperature while oils remain in the liquid state.

The analysts forecast the global tallow fatty acid market to grow at a CAGR of 2.65% during the period 2017-2021.
