

Amazing Therapies for Hair Loss

Huge Transformation as to How we treat Hair Loss. World Conference in Washington D.C.

ADELAIDE, AUSTRALIA, June 11, 2018 /EINPresswire.com/ -- Hair loss treatments are a major industry, world-wide. With strong focus on looks and looking youthful, this generation is prepared to spend whatever it takes to get results. And it is women who are experiencing the biggest increase in hair loss. And also suffer major psychological problems.

David Salinger, Director of the International Association of Trichologists, says "The emphasis is shifting to preventing hair loss in the first place by such means as reducing the white blood cells attacking the hair, that cause inflammation, and reducing the androgens affecting the hair. There is a huge transformation occurring as to how we now treat hair loss."

An increasing problem

With this in mind, more trichologists than ever before, from 14 countries, will be getting together in Washington D.C. on June 25th and 26th for the World Trichology Conference (see www.iatworldtrichologyconference.com).

“

There is a huge transformation occurring as to how we now treat hair loss”
David Salinger

Top lecturers from the USA, Canada, Brazil, India and Australia will discuss the latest developments when it comes to hair loss as well as the psychological aspects; of particular relevance are the messenger proteins, growth factors,

prostaglandins etc. that can either increase or decrease hair loss. And new products, including nutritional supplements, will be discussed that are exploiting these factors.

For further information, please contact David Salinger at dsalinger@ozemail.com.au OR Arisha Hawkins in Washington D.C. at (202) 553 5498.
