

Stack8 to Present the Intelligent Booking System for Cisco Webex Teams at Cisco Live 2018

Join the Stack8 for a discussion on how to enhance Cisco Webex Teams through meeting room automation

MONTREAL, QUEBEC, CANADA, June 12, 2018 /EINPresswire.com/ -- [Stack8](#), a leading provider of managed and professional services and proactive automation solutions for Cisco Unified Communications (UC) applications, today announced that it would be hosting a Collaboration Session at Cisco Live 2018 spotlighting the new [Intelligent Booking System](#) for Webex Teams.

Eric Losier, CTO at Stack8 will present an informative Collaboration Session entitled: "Revolutionize Scheduling Meetings via Stack8's Automated Intelligent Booking System & Webex Teams."

This session will show attendees how to solve the problem of booking meeting rooms via the Intelligent Booking System. The proper workspace, or meeting room, is a key requirement to having productive, collaborative work sessions. Users need the right sized space; the right room features and shouldn't struggle with the logistics of booking these spaces.

We have all been in the situation where we are forced book a smaller room than is needed because there is nothing else available. Then as you make your way to your meeting, you walk past countless meeting rooms where half the seats are empty, any one of which could have easily used your smaller room allowing you to conduct your meeting in a suitably sized space.

As part of its [Meeting Solutions](#) portfolio, the Stack8 team has created the Intelligent Booking System using Webex Teams, Proximity, Exchange & Graph. The Intelligent Booking System is designed to ensure optimal utilization of your meeting rooms while facilitating the process of booking them. It's like having someone proactively overseeing your room bookings to ensure the greatest ROI on your meeting room investments.

About Stack8

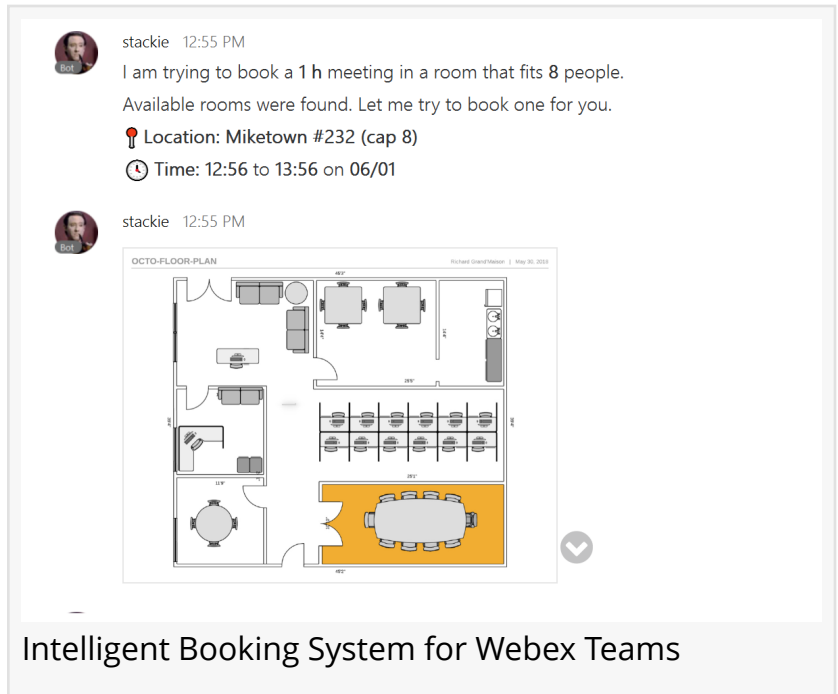

We work with Cisco UC customers who need to reduce the cost and complexity of keeping their UC environment running efficiently and want to minimize (or eliminate) user frustrations around system performance.

Essentially, we are Cisco UC specialists, that provides a mix of managed services, proactive automation, and in-depth expertise to address both the mundane and complex Cisco problems, helping organizations maximize both the frequency and range of use of the technology. Unlike traditional Cisco partners, our approach addresses Cisco UC issues, and opportunities more thoroughly, reducing the delays and frustrations that arise when expertise is lacking and helping to identify quick wins to get more value from the system, building confidence and support in the user community.

Founded in 2010, Stack8 Technologies is an independent, privately held company based in Montreal, Canada. To find out more, please visit www.stack8.com.

The screenshot shows a chat window with two messages from a user named 'stackie'. The first message is at 12:55 PM and says: "I am trying to book a 1 h meeting in a room that fits 8 people. Available rooms were found. Let me try to book one for you." Below this message are two system-generated details: "Location: Miketown #232 (cap 8)" and "Time: 12:56 to 13:56 on 06/01". The second message, also at 12:55 PM, is a screenshot of a floor plan titled "OCTO-FLOOR-PLAN" by Richard Grand/Henry, dated 1 May 2012. The floor plan shows several rooms, with one room containing a large conference table and chairs highlighted in orange. Below the floor plan is a grey bar with the text "Intelligent Booking System for Webex Teams".
