

Sureline Systems And Alibaba Cloud Forge Technology Partnership

SAN JOSE, CA, UNITED STATES, June 13, 2018 /EINPresswire.com/ -- [Sureline Systems](#), a leader in enterprise-class on-premises, remote and cloud, physical and virtual server [Migration](#) and [Disaster Recovery](#) solutions has signed a technology licensing agreement with Alibaba Cloud, the cloud computing arm of Alibaba Group, for Sureline's SUREedge Migrator and DR technology.

“We are very excited to enter into this new technology partnership based on a technology licensing agreement,” said Ravi Goyal, CEO, Sureline Systems. “This partnership with the leading cloud provider in China certainly validates our innovative, hypervisor agnostic and scalable cloud migration and DR solutions.”

“

This partnership with the leading cloud provider in China certainly validates our innovative, hypervisor agnostic and scalable cloud migration and DR solutions.”

Ravi Goyal, CEO, Sureline Systems

SUREedge Migrator captures application consistent images from any physical or virtual server. These images are then replicated using efficient deduplication, compression and encryption, to a local, remote site, and Cloud. It includes a migration planner to develop an end-to-end plan to automate the overall migration process. SUREedge leverages its patented automated transformation technology to migrate from any source to any target, where dissimilar hardware or operating environments are used at the source and target.

SUREedge Disaster Recovery (DR) delivers enterprise-class DR with WAN-optimized active-active replication, global

deduplication, compression, and encryption. This allows IT managers to securely and quickly protect all workloads, applications, data, etc., replicating from any physical or virtual server to any target, Cloud or remote site. A central management console and agentless architecture lowers operational expenditures (OpEx) for an efficient and cost-effective DR solution and Failback. DR plans can be tested with no impact on the production environment to ensure confidence and speed of execution if a disaster should occur.
