IT Governance expands UK presence with brand new Scotland base

ELY, UNITED KINGDOM, June 15, 2018 /EINPresswire.com/ -- Ely, United Kingdom, 15 June 2018 – IT Governance, the leading provider of information security and penetration testing services, has opened a new office in Edinburgh, Scotland as it continues its worldwide expansion.

With offices already in the Gulf, US and across Europe, IT Governance's latest opening coincides with its aim to help organisations in Scotland improve their cyber resilience at a time when this subject has never been more pertinent in this area of the UK.

Alan Calder, founder and executive chairman of IT Governance, said: "The decision to expand our presence into Scotland is just the next step in our strategy for IT Governance. We're very excited as this gives us the platform to service this market and bring our cyber resilience products to Scottish organisations."

New legislation in the country, such as The Scottish Public Sector Cyber Resilience Scheme, enforces a different approach to the way the public sector treats cyber threats. IT Governance's specialism in this field means the company is well placed to help the public sector tackle the issue.

IT Governance is a specialist in ISO 27001 implementation, Cyber Essentials certification, the PCI DSS and the GDPR. Please visit the website for more information about IT Governance's cyber resilience products and services, email servicecentre@itgovernance.co.uk or call +44 (0)333 800 7000 to speak to the consultancy team.
