PUNE, INDIA, June 15, 2018 /EINPresswire.com/ --

[Acoustic Wave Sensor Market 2018](#)

This report studies the global Acoustic Wave Sensor market status and forecast, categorizes the global Acoustic Wave Sensor market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in United States, Europe, China, Japan, South Korea and Taiwan and other regions.

Acoustic Wave Sensors are a class of microelectromechanical systems (MEMS) which rely on the modulation of surface acoustic waves to sense a physical phenomenon. The sensor transduces an input electrical signal into a mechanical wave which, unlike an electrical signal, can be easily influenced by physical phenomena. The device then transduces this wave back into an electrical signal. Changes in amplitude, phase, frequency, or time-delay between the input and output electrical signals can be used to measure the presence of the desired phenomenon.
