

Pillow Case Plus™ Promotes Better Sleep!

Specially-Designed Pillowcase Protects Against Sleep Injuries

LOS ANGELES, CALIFORNIA, USA, June 15, 2018 /EINPresswire.com/ -- The Beer Co., LLC announced today the availability of the new Pillowcase Plus™, the first-of-its-kind pillow case that is constructed with small extra cushions on each side. When people rest their wrist/hand on them while sleeping, it helps prevent elbow hyperextension (going past the point the joint is intended to function without pain / damage), a shortcoming in the human anatomy in the sleeping position (especially while sleeping on one's side). Everyone's elbows only bend sideways so far before stressing not just the elbow but potentially the whole arm, including the shoulder all the way down to the hand and wrist. This can cause pain, soreness and stiffness in those areas that may continue through the day. This patent-pending therapist-engineered, doctor-approved innovative solution often helps to such a degree that many won't go without it once trying it.

The Pillow Case Plus™ encases one's favorite pillow, adding two side cushions to form cozy channels for them to rest their hand/wrist at any elevation they're comfortable with, on top of the luxurious perfectly-sized, ideal height pads or wherever they care to nestle inside the soft channels. A. Maria Hester, M.D. says, "I believe this product has true potential. There's no more messing with the pillow to get it just right. Doubling it over or pushing the material inside around. I slept the best I have for a long time." Most people tend to sleep with their arms up around our pillow and the Pillow Case Plus™ also encourages them to not lay with their arm under the pillow which can also lead to pain and numbness from nerve compression. According to ProperPillow.com, it's common to suffer elbow injuries by sleeping incorrectly at night, potentially leading to a chronic condition.

"Everyone knows how important a good night's rest is to their daily mood. The Pillow Case Plus™ can certainly help, as well as function to expand their typically standard size pillow, maybe giving one's small child or favorite pet a little more room and comfort," said inventor, Victor Beer. Based in Los

Angeles, Beer states that the company's mission is to maximize the time one sleeps comfortably so that they can approach their day with a positive, fresh perspective and make the most of their world.
