"Since the “reform and opening up to outside world” policy was enforced in 1978, nearly 40 years of fast-paced economic growth has made China the world’s second largest economy and the world’s largest exporter. Its economy has been deeply integrated into the global economy and joined into the existing global order, led its economy to one that is closely interdependent with other global powerhouses, especially the United States.

As China’s economic and strategic clout has grown over the last four decades, the big powers’ relationship with China has expanded to encompass a broad range of global, regional, and bilateral issues. The rapid rise of China has caused a series of Western concerns: Will China's rapid rise change the existing global order? Will the rising China assume the leadership of globalization? China files WTO complaint against U.S, EU over its Non-Market Economy Status, challenge to liberal global economic order? Chinese geopolitics and Donald Trump took office could trigger a military conflict? How will China deal with the Sino-US trade conflicts? What role will China play in existing global order?

China’s Governance System: What the World Needs to Know About the Oriental Economic Superpower (2018 edition) answered these questions that Western countries’ think tanks, observers and analysts, policymakers are paying close attention.

The national culture has many aspects of connotation, but any kind of cultural core displays a unique way of thinking. The national culture of a country as the way of thinking will decide the attitude, behavior, and approach of the people and even the top leadership of this country towards the events

occurring in real world. China has, over five thousand years of civilized history, nurtured a unique nationalistic culture, enjoying over two thousand years of a feudal autocratic governance system. Its distinctive national culture fueled by Confucianism philosophy has evolved for thousands of years, still rooted in the minds and hearts of the Chinese people today. It is precisely this distinctive national culture of authoritarian governance in China's feudal society that has led to smooth running of the government for over two thousand years. Nowadays, the Chinese people have inherited reasonable quintessence of the Chinese national culture that incorporates Confucianism philosophy at its core while the Chinese Communist Party (CCP) chose an authoritarian governance system of the one-party ruling since the founding of the People's Republic of China.

In the circumstance of authoritarian governance system of the CCP's one-party ruling, China has not only embraced its distinctive national culture, but has also internalized this distinctive governance system, possessed the distinctive decision and policy-making process and the distinctive legislative process. This may even create an absolutely different interpretation or understanding for the same event than that of the Westerners.

All these are hard for Westerners to understand. Just for this reason, along with a multidisciplinary perspective, from sociology, social psychology, behavioral psychology, cultural psychology, historiography, economics to politics, this book introduces and expounds the Chinese national culture and its evolution with change of the times, the current Chinese governance system and its organizational structure, the Chinese decision and policy-making process and legislative process, and comments the latest and most sensitive issues and flash points that the Western think tanks, observers, analysts, and elites are paying close attention, finally, truthfully describes the challenges for governance system of the CCP.

The aim of this book is to help not only the Western countries' think tanks, observers, analysts, and elites concerned about China, but also the people those who are interested in China to really understand China. Therefore, this book draws only an honest and straightforward portrait, almost making no subjective inference. Analysis is based on officially published documents and data, but its contents are the latest and the most comprehensively systematic, constituting its own distinctive and complete system.
