Excerpts on Market Growth Factors

The forage market is significantly influenced by low supply, high demand and commodity prices. Increasing supply and high demand of forage are thus driving the price growth globally, especially in

the North American region.

Rising demand for changing conditions related to acres and supply are to surge the forage and turf grasses prices.

Advancement in bio-technology has driven increased adoption of forage seeds in this market.

Increasing use of agrochemicals such as pesticides, fertilizers, PGRs and so on are increasing the throughput of the agriculture. Thus, production of turf, ornamental and forage is set to escalate the market of these products significantly.
