

Tamping Machine Market - Global Industry Analysis, Size, Share, Growth, Trends and Forecast 2018 – 2025

PUNE, MAHARASHTRA, INDIA, June 20, 2018 /EINPresswire.com/ -- Global Tamping Machine Industry

New Study on “2018-2025 Tamping Machine Market Global Key Player, Demand, Growth, Opportunities and Analysis Forecast” added to Wise Guy Reports Database

This report studies the global Tamping Machine market status and forecast, categorizes the global Tamping Machine market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

The global Tamping Machine market is valued at 2110 million US\$ in 2017 and will reach 3410 million US\$ by the end of 2025, growing at a CAGR of 6.2% during 2018-2025.

The major manufacturers covered in this report

Plasser&Theurer

CRCC

MATISA

Robel

Harsco Rail

Remputmash Group

Sorema

Kalugaputmash

SCHWEERBAU

Gemac Engineering Machinery

A tamping machine or ballast tamper is a machine used to pack (or tamp) the track ballast under railway tracks to make the tracks more durable. Prior to the introduction of mechanical tampers, this task was done by manual labour with the help of beaters. As well as being faster, more accurate, more efficient and less labour-intensive, tamping machines are essential for the use of concrete sleepers since they are too heavy (usually over 250 kg (551 lb)) to be packed into the ballast by hand.

Early machines only lifted the track and packed the ballast. More modern machines, sometimes known as a tamper-liner or tamping and lining machine, also correct the alignment of the rails to make them parallel and level, in order to achieve a more comfortable ride for passengers and freight and to reduce the mechanical strain applied to the rails by passing trains. This is done by finding places where the sleepers have sunk from the weight of the passing trains or frost action, causing the track to sag. The tamper lifts each sleeper and the rails up, and packs ballast underneath. When the

sleeper is laid down again, the sagged rails now sit at the proper level. In cases where frost action has caused adjacent rails to rise higher, ballast tampers can raise rails above their original level to make the line level again. "Lining" rails doesn't involve ballast tamping, it merely ensures the rails are perfectly parallel and straight as possible. Combining tamping and lining into a single machine saves time and money, as only one machine needs to be run over the track to perform both functions. In the future, more and more companies will choose direct sale to customers in order to cut cost of sales. With the trends of more and more diverse needs from customers, there will be more customized sales. Besides, big companies with good reputation will choose to establish its own online order platform to cut cost.

Geographically, this report studies the top producers and consumers, focuses on product capacity, production, value, consumption, market share and growth opportunity in these key regions, covering North America

Europe

China

Japan

Southeast Asia

India

We can also provide the customized separate regional or country-level reports, for the following regions:

North America

United States

Canada

Mexico

Asia-Pacific

China

India

Japan

South Korea

Australia

Indonesia

Singapore

Rest of Asia-Pacific

Europe

Germany

France

UK

Italy

Spain

Russia

Rest of Europe

Central & South America

Brazil

Argentina

Rest of South America

Middle East & Africa

Saudi Arabia

Turkey

Rest of Middle East & Africa

On the basis of product, this report displays the production, revenue, price, market share and growth rate of each type, primarily split into

Straight Track Tamping Machines
Points and Crossing Tamping Machines
Multi-purpose Tamping Machines (MPT)

On the basis of the end users/applications, this report focuses on the status and outlook for major applications/end users, consumption (sales), market share and growth rate for each application, including

New Railway Lines Construction
Track Maintenance

The study objectives of this report are:

To analyze and study the global Tamping Machine capacity, production, value, consumption, status (2013-2017) and forecast (2018-2025);

Focuses on the key Tamping Machine manufacturers, to study the capacity, production, value, market share and development plans in future.

Focuses on the global key manufacturers, to define, describe and analyze the market competition landscape, SWOT analysis.

To define, describe and forecast the market by type, application and region.

To analyze the global and key regions market potential and advantage, opportunity and challenge, restraints and risks.

To identify significant trends and factors driving or inhibiting the market growth.

To analyze the opportunities in the market for stakeholders by identifying the high growth segments.

To strategically analyze each submarket with respect to individual growth trend and their contribution to the market

To analyze competitive developments such as expansions, agreements, new product launches, and acquisitions in the market

To strategically profile the key players and comprehensively analyze their growth strategies.

In this study, the years considered to estimate the market size of Tamping Machine are as follows:

History Year: 2013-2017

Base Year: 2017

Estimated Year: 2018

Forecast Year 2018 to 2025

For the data information by region, company, type and application, 2017 is considered as the base year. Whenever data information was unavailable for the base year, the prior year has been considered.

Key Stakeholders

Tamping Machine Manufacturers

Tamping Machine Distributors/Traders/Wholesalers

Tamping Machine Subcomponent Manufacturers

Industry Association

Downstream Vendors

Available Customizations

With the given market data, QYResearch offers customizations according to the company's specific needs. The following customization options are available for the report:

Regional and country-level analysis of the Tamping Machine market, by end-use.

Detailed analysis and profiles of additional market players.

Some points from table of content:

Global Tamping Machine Market Research Report 2018

1 Tamping Machine Market Overview

1.1 Product Overview and Scope of Tamping Machine

1.2 Tamping Machine Segment by Type (Product Category)

1.2.1 Global Tamping Machine Production and CAGR (%) Comparison by Type (Product Category)(2013-2025)

1.2.2 Global Tamping Machine Production Market Share by Type (Product Category) in 2017

1.2.3 Straight Track Tamping Machines
