HYDERABAD, TELANGANA, INDIA, June 20, 2018

/EINPresswire.com/ -- According to the new market research report by [IndustryARC](#) titled “Disposable Glove Market: By Polymer Type (Natural Rubber or Latex, Vinyl, Nitrile, Others); Lubricant (Powdered, Non-Powdered); End-Users (Clinical (Hospitals, Others) Non clinical (Industries, Institutions)); By Applications (Sterile Surgical, Non-sterile, Examination, Others); By Geography – Forecast (2018-2023)”, the market is experiencing robust growth due to the growing demand for synthetic rubber gloves.

North America continues to lead the market share during 2018-2023.

North America region held major share in global disposable glove market, followed by the European and Asia-Pacific region, in terms of value. The market is more prevalent in the countries of the U.S., U.K., Malaysia, Thailand and Canada. North America held a major share in the global Disposable Glove market with revenue of \$2.602 billion in 2017, whereas the Asia-Pacific region is projected to witness the highest growth rate of 9.8% CAGR throughout the forecast period of 2018-2023. North America is projected to reach \$3.371 billion by 2023 at 4.7% CAGR.

North America is the largest market for disposable gloves as compared to the developed APAC and European markets. The APAC region is growing at a fast rate, predominantly due to large number of raw material manufacturers required for the production of disposable gloves. APAC countries are the largest exporter of medical gloves to various countries around the globe.

Selected / Sample Analysis done in the full Report:

Multiple players are involved, right from the raw material supplier to disposable gloves manufacturer to the distributors of these products to the final end users.

APAC region is highly rich in the production of raw material. Hence, raw material that is required for manufacturing of disposable gloves are exported from APAC to other regions/countries.

Manufacturers of disposable gloves compound the raw materials for producing and dipping disposable gloves.

For the domestic market, the products can be directly transported to the distributor from the manufacturers. But in case of export, the products are shipped to foreign distributors who in turn supply the products to the final end users.

Providing end-to-end solutions allows them to have a consistent control over the quality throughout the value chain.
