

## Blind Spot Detection Global Industry Sales, Supply and Consumption 2018 and Forecast to 2027

Blind Spot Detection Global Market Highlights and Major Players Analysis 2027

PUNE, INDIA, June 21, 2018 /EINPresswire.com/ -- The Driver Assistance System Market statistical report, published by Market Research Future contains succinct information on the <u>blind spot detection</u> driver assistance system market, segmented by Region (North-America, Europe, Asia-Pacific, and ROW) and forecast from 2016-2027. The various factors driving the driver assistance system market are wide range of advantages offered by driver assistance system types, governmental regulations mandating driver assistance systems.

Blind Spot Detection is a system to detect other vehicles on the side or rear of the vehicle which usually falls in the 'blind spot range' of the driver. A blind spot is area around the vehicle which cannot be easily observed by the driver. Mostly, blind spots in passenger cars come to be due to car pillars or limitations on how the mirrors are positioned and how far they can be adjusted. When another vehicle enters the blind spot range, the sensors detect it and send visual or audio alarms to the driver. In some vehicles, the blind spot detection is aligned with lane departure warning. This gives increased warnings to indicate possible lane change by the vehicle.

North America Blind Spot Detection Driver Assistance System Market is expected to reach USD 1865.05 Million by 2027 with a CAGR of 24.90%
