

MagGrow and Pacific Ag Rentals demonstrate the benefits of their new Strawberry Sprayer

MagGrow and Pacific Ag Rentals (PAR) have built a 3 point sprayer that uses less total volume and reduces drift substantially.

SALINAS, CA, USA, June 22, 2018 /EINPresswire.com/ -- Dublin, Ireland, and Salinas, California June 21, 2018 - MagGrow and Pacific Ag Rentals have created a best in class sprayer that was recently demonstrated to select strawberry growers and PCAs at the Pacific Ag Research facility in Salinas. The demonstration involved spraying live plants and simultaneously compared a conventional sprayer configuration to a sprayer configured with MagGrow technology. Comparative tests showed that the application rate could be halved from 150 gallons per acre to 75 gallons per acre and achieve equivalent coverage result on the sprayed plant. This represents a significant step forward in the application of pesticides in the strawberry market and can result in significant benefits being derived by the end grower, including labor and water savings, extended spray coverage per event, reduced drift and better disease control. Both companies are now actively marketing this best in class solution in the California market and look forward to bringing this exciting development to the strawberry market.

About MagGrow – www.maggrow.com

MagGrow, an Irish company, was set up in 2013, and currently operates across

three continents, North America, Europe and Africa. MagGrow is a patented, proprietary technology for droplet formation that yields superior drift reduction of 50 to 70% and spray coverage performance of 20 to 40% compared to conventional spraying. MagGrow has many other benefits to drift reduction and coverage such as significant reduction in water usage by up to 50%, extended spray windows, and reductions in labor. MagGrow is working closely with leading research universities including UC

About Pacific Ag Rentals - www.pacificagrentals.com

Pacific Ag Rentals is a "Farmer Owned" Co-op tractor rental company, headquartered in Salinas CA, with branches in Colusa, Fall River Mills, Stockton, Brawley, Bakersfield and Five Points CA as well as Yuma AZ. Our goal is to provide agricultural tractors and implements to the vegetable and fruit/nut growers of the western United States. We have rented equipment as far east as Colorado and Texas and as far north and south as Washington and Mexico. Pacific Ag Rentals strives to provide the highest quality service with a knowledgeable staff ready to assist all growers in whatever their needs. Our rental fleet is comprised of over 2000 pieces of equipment from all the brands you trust, like John Deere, Challenger, Kubota, Harlo, Massey Ferguson, Rome, Domries, Ag Leader, PAW, Wilcox and so much more. We feel these brands are rental worthy, built to last and will hold up to the most rigorous of challenges. We work hard to keep you going by providing you with only the latest model equipment backed by an easy exchange policy should a problem arise with your rental. Our rates are competitive and our terms are easy.
