

Wright Engineers Recognized as “Best Firm to Work For” in 2018

Las Vegas-based Wright Engineers ranked No. 1 Structural Engineering Firm in United States and Canada

LAS VEGAS, NV, USA, June 25, 2018 /EINPresswire.com/ -- Wright Engineers, a structural engineering firm with offices in Las Vegas, Salt Lake City, Phoenix and Irvine, has been named the 2018 “Best Firm to Work For” in the United States and Canada. The award from Zweig Group will be presented in September during the annual Hot Firm conference in Dallas.

The honor is considered one of the most prestigious awards in the industry, honoring outstanding workplaces in architecture, geotechnical, environmental, and civil, structural and multidiscipline engineering firms. The award is determined from combined scores of comprehensive employee surveys and corporate evaluations, and looks at workplace design, teamwork, benefits, amenities and corporate culture.

"We are honored to receive this award on behalf of our more than 70 employees," said Brent Wright, firm founder and CEO. "Being recognized as the best place to work in the country is one of the proudest achievements in our 21-year history."

In recent years, Wright has made the top 10 list, placing as high as sixth, but this year marks the first time Wright has been ranked as the “Best Firm to Work For” in the Structural Engineering category. Wright has previously been ranked one of the nation's fastest growing engineering firms.

Founded in 1997 and based in Las Vegas, Wright Engineers is licensed in all 50 states. The firm's more notable projects include the UNLV William F Harrah College of Hotel Administration Building - a five-story, 93,500-square-foot building housing state-of-the-art classrooms, offices, and meeting spaces; Station Park Village Center in Farmington, Utah – an open-air shopping center that includes a hotel, more than a dozen restaurants, grocery, office space and retail stores; and The Porsche Experience center in Carson, Calif. Situated on 53 acres, this 50,000-square-foot state-of-the-art facility for current and future Porsche enthusiasts, features display areas, staff training, a track and a science lab dedicated to athletic performance. In addition to providing structural engineering services for a wide variety of projects in the U.S. and throughout the world, including office, industrial, health care, hospitality, military, residential, retail, education, sports and recreation, public works, restaurant and religious, the firm gives back through employee volunteer hours, donations and provides pro bono services.

"We are especially proud of our employees and their commitment to the communities in which we have offices," added Wright. "Our employees have logged thousands of volunteer hours, providing hands-on support, fundraising, serving on boards, and spearheading projects. We are pleased to support their efforts with time off, matching gifts and offering expertise as needed."
