A dietary supplement is a manufactured product intended to supplement the diet when taken by mouth as a pill, capsule, tablet, or liquid. A supplement can provide nutrients either extracted from food sources or synthetic, individually or in combination, in order to increase the quantity of their consumption. The class of nutrient compounds includes vitamins, minerals, fiber, fatty acids and amino acids. Dietary supplements can also contain substances that have not been confirmed as being essential to life, but are marketed as having a beneficial biological effect, such as plant pigments or polyphenols. Animals can also be a source of supplement ingredients, as for example collagen from chickens or fish. These are also sold individually and in combination, and may be combined with nutrient ingredients.

The increasing demand for Online Dietary Supplement drives the market, especially for sports sector and medicine sector. The prevalence of chronic diseases such as cardiovascular disorders, diabetes, and obesity is another key driver to boost the growth of online dietary supplement market. With improvement of people living standard, people focus on their health and medical condition. Additionally, Ageing population is one of the factor expected to drive the growth of dietary supplements over the forecast period. Convenience of online shopping encourages customers to purchase this product and price is cheap and cheerful. North America is expected to witness an increase in growth over the forecast period owing to the shift of interest among millennials and adults. The Asia Pacific accounted for 35.4% of global dietary supplements market, raising awareness towards nutritional enrichment in China and India is expected to remain a favorable factor for the

market. Markets of Germany, UK, France, and Italy are expected to pose a substitutional threat to dietary supplements industry over the forecast period.
