Wiseguyreports.Com adds “Video Intercom Devices Market –Market Demand, Growth, Opportunities, Analysis of Top Key Players and Forecast to 2025” To Its Research Database.

Report Details:

This report provides in depth study of “Video Intercom Devices Market” using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Video Intercom Devices Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

In 2017, the global Video Intercom Devices market size was 1820 million US\$ and it is expected to reach 2600 million US\$ by the end of 2025, with a CAGR of 4.6% during 2018-2025.

This report studies the global Video Intercom Devices market size, industry status and forecast, competition landscape and growth opportunity. This research report categorizes the global Video Intercom Devices market by companies, region, type and end-use industry.

An intercom (intercommunication device), talkback or doorphone is a stand-alone voice communications system for use within a building or small collection of buildings, functioning independently of the public telephone network (Azori 2016). Intercoms are generally mounted permanently in buildings and vehicles. Intercoms can incorporate connections to public address loudspeaker systems, walkie talkies, telephones, and to other intercom systems. Some intercom systems incorporate control of devices such as signal lights and door latches.

Video intercom devices are intercom devices which use video method.

First, for industry structure analysis, the video intercom devices industry is not concentrated. The top five producers account for about 46% of the revenue market in 2016. Regionally, Asia is the largest production area of video intercom devices, and China and Japan are the main production country of video intercom devices in China. Compared with Japan produced products, video intercom devices produced in China are cheap and large volume

Second, the production of video intercom devices increases from 11.14 Million Units in 2012 to 14.16 Million Units in 2016, with an average growth rate of more than 5.5%.

Third, China is the largest consumption region of video intercom devices, which occupied 36% of the

sales market in 2016. It is followed by North America and Europe, which respectively have around 19.5% and 17% of the global total industry.

Fourth, for price trend analysis, a key variable in the performance of video intercom devices producers is components and raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global video intercom devices revenue would keep increasing with annual growth rate with 3~5%. We tend to believe that this industry still has a bright future, considering the current demand of video intercom devices driven by urbanization in developing countries. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.
