

# Fiberglass Fabricator, The Resource Factory, Wins Major Contracts, Expands Production

*The Resource Factory, a custom fiberglass fabrication company, announced winning two high-profile contracts and investment in equipment for expanded production.*

SARASOTA, FL, UNITED STATES, June 25, 2018 /EINPresswire.com/ -- The Resource Factory, a custom fiberglass fabrication company, has announced winning a pair of high-profile contracts and the continuing investment in its future growth by expanding its production capacity with a new rotocast machine.

## Selected for Prestigious Advertising Campaign

Gyro Design, a major American advertising agency, selected The Resource Factory for a fabrication project involving The Sentry Insurance Group's sponsorship of the PGA Tour's Sentry Tournament of Champions in Hawaii.

The Resource Factory will manufacture blue chairs designed to convey the message that Sentry is a company people can trust to sit down and hold a two-way conversation to truly understand their customers' insurance needs.

## Quality Creations for Great Wolf Lodge

The other major contract is with id3 Design of Atlanta, which has tapped The Resource Factory for the fabrication of [custom fiberglass sculptures](#) and other three-dimensional elements for The Great Wolf Lodge resorts in Georgia, Minnesota and Arizona.

The Resource Factory was the obvious choice for both projects. The company has been in the [fiberglass sculpture fabrication](#) business for over 30 years and has experience manufacturing for diverse projects, including [theme park attraction design](#).

Walt Disney World and Universal Studios are among The Resource Factory's list of clients, and the company continues to expand by making investments that will allow it to meet the growing demand for its work while maintaining high standards of artistry and craftsmanship.

## Investing to Satisfy Customer Demand

The Resource Factory has added a third Rotocast machine to its lineup of in-house equipment. The machine will increase in production capacity for three-dimensional fiberglass sculptures and allow the business to better serve its customers who demand the highest quality work.

The foundation of The Resource Factory's business is fiberglass fabrication. The company is unique in its ability to take our clients' ideas and, using a combination of art and engineering, turn those ideas into reality.

The Resource Factory can create fiberglass sculptures that no other company can offer. From start to

finish, their fabrication methods will transform a drawing into a three-dimensional work of art. They make signs and logos too.

Serving communities across the United States, The Resource Factory is committed to using the finest fabrication methods possible and providing customer service that goes above and beyond normal expectations.

Whether the project is modifying a piece or building a brand new sculpture from scratch, The Resource Factory can handle the job. Contact The Resource Factory to see what kind of magic they can work for you by visiting <http://theresourcefactory.com> or calling them at (941) 366-3640.

About The Resource Factory:

The Resource Factory designs 3D sculptures for companies worldwide. The stories we tell through scenic design captivates audiences and creates a memorable experience for all. The Resource Factory is widely known in the industry for our great reputation and customer service. We make each customer interaction satisfying to construct 3D sculptures out of fiberglass and foam, scenic design, props, and signage within the turnaround time needed.

The Resource Factory has worked with companies around the globe, including Walt Disney, Universal Studios, Nickelodeon, Pepsi, and more. Our client list encompasses a diverse array of venues including theme parks, sporting arenas, zoos, museums, restaurants and retail stores. The Resource Factory team, comprised of project managers, graphic and exhibit designers, along with highly skilled fabricators, have the experience and talent to coordinate, research, design, manage, and produce single elements or an entire environment.
