

Local School Resource Officers Receive Bulletproof Body Armor

Stow, Ohio-based ShotStop Ballistics Donates Lightest, Thinnest Rifle Plates to Stow-Munroe Falls High School and Kimpton Middle School Resource Officers

STOW, OHIO, USA, June 26, 2018 /EINPresswire.com/ -- With school safety on the minds of many these days, it's great to get some good news for a change. [ShotStop®](#) Ballistics, based in Stow, Ohio, recently donated two sets of bulletproof [body armor plates](#) to the School Resource Officers at Stow-Munroe Falls High School and Kimpton Middle School.

On Tuesday, May 29, representatives from Stow-Munroe Falls City School District, Stow Police Department, and Munroe Falls Police Department met with ShotStop Ballistics at the high school to receive the body armor plates.

“

They put it on the line each and every day to secure our staff and our students. It's a wonderful opportunity to make them safer.”

Superintendent Tom Bratton

ShotStop donated its top-of-the-line bulletproof inserts, which weigh nearly half of what the Resource Officers had before. The Duritium® III+PA plates are rated Level III with the National Institute of Justice (NIJ), which means they will withstand impact from high-powered rifles, like the AR-15 used in many school shootings in recent years. And, with a weight of around three pounds and about half an inch thick, they are also far less bulky than the previous ceramic plates worn by the Officers.

“They put it on the line each and every day to secure our staff and our students,” said Superintendent Tom Bratton. “It's a wonderful opportunity to make them safer.”

Some of the employees at ShotStop have children in the Stow-Munroe Falls school system, and because the company is based in Stow it was happy to help.

“We have supported this community for as long as we've been here,” said Vall Iliev, founder of ShotStop Ballistics. “These guys are here to protect us and our kids; we are here to protect them.”

About ShotStop Ballistics

ShotStop Ballistics is developing the lightest, thinnest, and strongest advanced armor technologies in

the world. From body armor plates and [armored vehicle protection](#), to its innovative BallisticBoard® material and custom armor solutions, ShotStop Ballistics is leading the way in improving the protection of our police, military, special forces, S.W.A.T., security personnel, and more. With technical expertise that spans more than 35 years (see Vallmar Engineering), the ShotStop team brings together engineers, Ph.D.'s, chemists, product developers, and ballistic specialists, to create ballistic technology that saves lives, reduces physical encumbrance, and maximizes performance. ShotStop consistently uses independent and federally accredited ballistic labs, including the Department of Defense and National Institute of Justice, to ensure ShotStop armor provides our servicemen and women with the best possible protection. Contact ShotStop Ballistics at www.ShotStop.com, call 800-986-0795/330-686-0020, email info@shotstop.com, or write to 1000 Campus Dr., Suite 300, Stow, Ohio 44262.
