

# Less than 2 weeks to go until the 13th annual ADMET event in London

*SMI Group Reports: With less than 2 weeks left until the 13th annual ADMET conference takes place in London, places are becoming increasingly limited.*

LONDON, UNITED KINGDOM, June 27, 2018 /EINPresswire.com/ -- SMI's 13th annual ADMET conference is set to commence on the 9th and 10th July. This year's two-day event will bring together a global audience of DMPK scientists, toxicologists and senior industry thought-leaders dedicated to addressing the current market challenges, driven by an increased demand for screening and advances in technology.

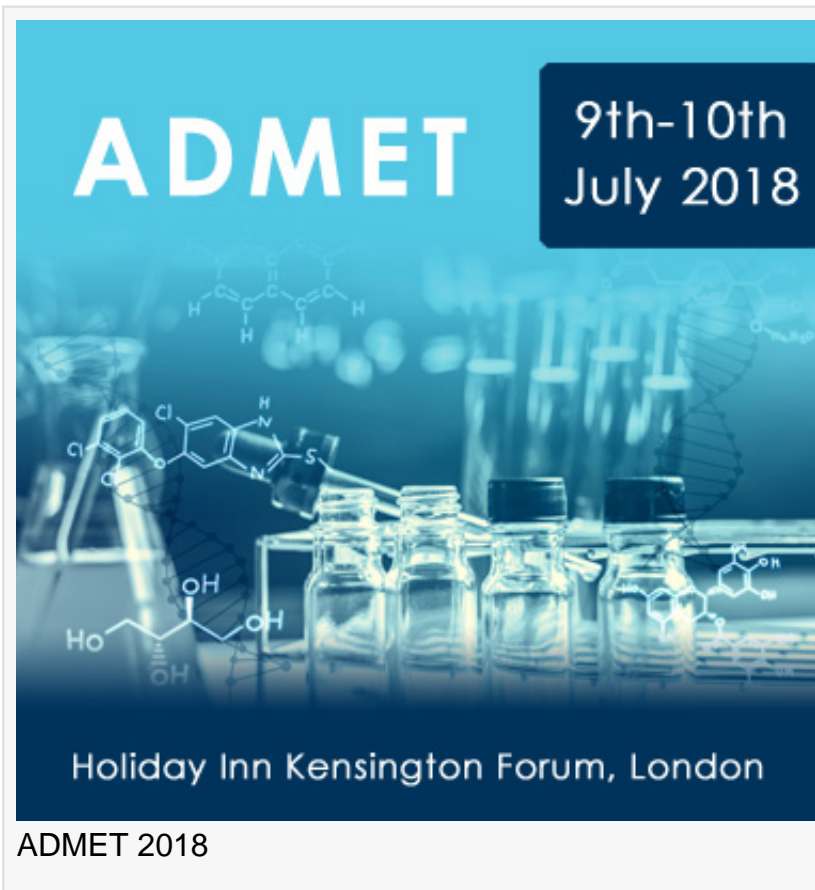

Delegates will have the opportunity to [network and hear insightful presentations and case studies](#) on topics such as toxicology research strategies, modelling techniques, predictive pharmacology, pre-clinical DMPK studies, and many more.

## Spotlight Presentations and Speakers:

“[KPB – Strengths and limitations of compartmental modelling](#)”, presented by Sheila-Annie Peters, Head, Translational Quantitative Pharmacology, Merck Serono. Peters will discuss the topics of the making of a successful drug candidate, as well as defining parameters in acute and chronic toxicity evaluations, drug safety testing, and cost-benefit assessments.

“Intracellular pharmacokinetics: Emerging opportunities for tailoring project support”, presented by Andreas Reichel, Vice President, Research Pharmacokinetics, Bayer. Reichel's presentation will focus on the mechanisms that control intracellular drug concentrations, experimental approaches that are suitable to estimate unbound intracellular concentrations in selected cell types as well as their applicability to advance our understanding of intracellular drug-target interactions. In addition, case studies will be shown to illustrate how the field of ICPK can offer novel opportunities that can be used to address key questions in drug discovery projects, thereby enhancing our understanding of the intracellular fate of drugs.

## 2018 Event Agenda:

The poster features a blue background with a laboratory scene including glass vials and chemical structures. The text 'ADMET' is prominently displayed in white, with '9th-10th July 2018' in a dark blue box to the right. At the bottom, it reads 'Holiday Inn Kensington Forum, London' and 'ADMET 2018'.

Day 1: Opening keynote from AbbVie by Vice President, Global Pre-Clinical Safety, Senior Research Fellow, Eric Blomme on Novel technologies and computational tools in discovery toxicology: opportunities and challenges - his exclusive speaker Q&A interview is available on the event website's download centre.

Day 2: Opening keynote from Vertex Pharmaceuticals by Peter Littlewood, Director of DMPK. The talk will discuss Human PK and dose predictions for compounds with challenging physiochemical profiles.

With the conference fast-approaching, places are now limited and potential attendees are urged to book soon at an exclusive price of £999 available for a limited time, to avoid disappointment. For the full agenda and list of expert speakers, download the latest brochure from the event website, as well as more exclusive free content including speaker interviews, at: [www.admet-event.com/einpr](http://www.admet-event.com/einpr)
