Construction is the process of constructing a building or infrastructure. Construction differs from manufacturing in that manufacturing typically involves mass production of similar items without a designated purchaser, while construction typically takes place on location for a known client. Construction as an industry comprises six to nine percent of the gross domestic product of developed countries. Construction starts with planning, design, and financing; it continues until the project is built and ready for use.

China is the largest market in terms of value and is driving the market for residential building construction. The UK and the USA are forecasted to have the fastest growth.

This report focuses on the global top players, covered
