Compared with a million-ton-production market size of isobutyl alcohol, 1-octanol is just a small market because the downstream application of 1-octanol is much smaller than the isobutyl alcohol. 1-octanol can be classified into two types: industrial grade and food grade, survey results showed that 80.29% of the 1-octanol market is industrial grade in 2015. With the development of economy, these industries will need more 1-octanol. So, 1-octanol has a huge market potential in the future.

China is now one of the major consumption regions in 1-octanol market, but it mainly depends on import from South Asia in fact. The price of the 1-octanol in China has increased a lot in the past

years.

The worldwide market for 1-Octanol is expected to grow at a CAGR of roughly 4.7% over the next five years, will reach 290 million US\$ in 2023, from 220 million US\$ in 2017, according to a new GIR (Global Info Research) study.
