Executive Summary

Global Electric and Non-Electric Wheelchairs Market valued approximately USD xxx million in 2016 is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2017-2025. The electric wheelchair market has witnessed significant growth in the recent years. Power wheelchairs are among the technological inventions that are very beneficial for people with disabilities, as they do not require a caretaker and would be in a position to operate the chair by themselves. The technology is gaining lots of attention due to its easy to use features. Electric wheelchair is very convenient to use with multi-directional movements with simple controls, driving the demand for the product. These wheelchairs are available with different controls, such as Conventional Joysticks, Compact Joysticks, Finger Controls, Head Controls, Touchpad Controls, Sip and Puff Drive Controls, Wafer Boards, and Switch Drive Controls. The unique control options have attracted consumers, as they can select the product according to their comfort. The factors driving the growth of the electric wheelchair market are increase in ageing population and growth in the number of incidence of spinal deformities. Additionally, increase in the number of road accidents and obese population have also contributed to the growth of the electric wheelchair market.
